

Welcome to the Ciao Paolo newsletter. The aim of this newsletter is to keep our patients updated on the events and changes going on at the practice.

In this newsletter you will find details of our new staff, new services that we offer, and reminders of services that we have always done that you may have forgotten about.

In this newsletter we hope to present the friendly face of the practice to encourage you to come and visit us.

Orthodontic treatment

Cfast is a cosmetic tooth alignment system used to straighten front teeth in adults. It is a discreet tooth coloured brace worn for around 6 months to gently move teeth, significantly improving the appearance of your smile. Further information can be found at Cfastresults.com

We are excited to announce we now have a new mobile friendly website to make the experience better for users. Why not have a look for yourself.

Skin Treatments.

FACIAL AESTHETIC TREATMENTS

We now provide facial injections (Botulinum Toxin Type A) at the practice. Injecting small amounts of anti wrinkle treatment such as Botulinum Toxin Type A into the facial muscles can have the result of smoothing the skin and giving a fresher, younger appearance. Here at Ciao paolo we are skilled in helping our patients achieve the results they desire. The consultation is free, during this time Dr Fraser will assess the individual and listen to their expectations of treatment. Dr Fraser's philosophy when it comes to facial aesthetic treatment is that less is more.

FACIAL AESTHETIC TREATMENTS ARE AVAILABLE FROM £195. PLEASE CONTACT PAULA AT THE PRACTICE FOR MORE INFORMATION.

We would like to say goodbye and good luck to both Jackie Davidson who has left for a teaching post training dental students. Also Roslyn has left us for pastures new working at private implant clinic in the city centre. We would like to wish them both good luck and thank you both for all your input at Ciao paolo.

What's new at the practice?

New Staff.

We are delighted to welcome our new dentist Elise Fraser BDS to the practice. Elise graduated from University of Glasgow in 2007. She has since gained a lot of experience in both NHS and private practice. She has completed postgraduate training in recent years in restorative dentistry, cosmetic orthodontics, sedation and cosmetic facial injections. Elise has a calm manner and gentle touch and aims to make your dental visit as comfortable as possible. She enjoys all aspects of dentistry and believes in a preventative and minimally invasive approach. In her free time Elise loves being active, enjoying distance running, skiing and hill walking with her husband Barry, as well as travelling to new places. Originally from the Black Isle in the highlands, she is a teuchter at heart and still visits regularly.

We would also like to welcome our new nurse Emma Bradley, Emma qualified July 2016 and has worked in both private and NHS where she gained valuable experience. It is important to Emma that patients have the best experience possible at the dentist.
